

Cover a Flat

You need: 2 flats, 20 tens rods, 30 unit cubes,
and a pair of dice

Rules:

1. Each takes one flat.
2. Take turns. On your turn, roll the dice. The sum tells how many unit cubes to take. Place them on your flat.
3. Decide if you want to exchange 10 unit cubes for a tens rod.
4. Give the dice to your partner.
5. Play until one player covers his or her flat.

Notes:

1. You may exchange only when you have the dice.
2. Watch to make sure you agree with your partner's moves.

Use the virtual rods on this link to play the game:
