

# Family Math Night

Let's subtract! 😊

⇒ I can subtract by using Legos.

⇒ I will know I am successful when I subtract a the correct number of Legos and find the answer.

## Directions:

1. Find a partner.
2. Choose 10 Lego bricks and stack them up into a tower.
3. Roll the dice.
4. Take off that number of bricks, and then count how many you have left. Say the equation out loud, for example: "I had 10 bricks I took off 2, and now I have 8."
5. Take turns, and keep rolling and removing bricks until there are none left.
6. The first person to unstack them all is the winner.
7. If you have time, play again.
8. Place the Legos back in the bin when you are done. 😊 HAVE FUN...

Standards: Kindergarten Common Core (Math-Operations and Algebraic Thinking)  
CCSS.Math.Content.K.OA.1 Represent addition and subtraction with objects, fingers, mental images, drawings, sounds, acting out situations, verbal explanations, expressions, or equations.  
CCSS.Math.Content.K.OA.2 Solve addition and subtraction word problems, and add and subtract within 10, by using objects or drawings to represent the problem.
